

## Application

They are generally used to transmit the telephone line on aerial poles to subscribers in rural places and out of town.

## Construction

**Conductor** : Annealed Copper Wire

**Insulation** : N/A

**Outer Sheath** : LDPE

## Construction

**1** Conductor

**2** Outer Sheath

Electrical Properties	Conductor Diameter (mm)		
	0,8	0,9	1,0
Conductor Resistance ( $\Omega/\text{km}$ ) 20 °C max.	36,78	28,96	23,39
Insulation Resistance (Megaohm-km)	10000		
Dielectric Strength (VAC 3 Minute)	4000
